FIFTY GLASS MOSAIC

This Artisan-edge glass mosaic is made with recycled glass pieces and may include irregular edges, rustic appearances, minimal imperfections or slight variations in sizing and squareness. These characteristics are inherent to this product due to the manufacturing process. The slight size or shape variations may affect the grout joint appearance, further enhancing the natural aspect of this product. Use constitutes acceptance.

GLASS MOSAIC

All Mosaics 100% recycled glass mosaics series are made of molten glass. Molten glass characteristics may include irregular edges and small variations in size. These characteristics are inherent to the product and to the standard production. The small size and shape variations can affect the grout joint appearance and enhance the natural aspect of these products. Use constitutes acceptance.

DOT LINK

GREAT GRIP.

92% of the glass mosaic tile surface stays clean and therefore makes it ideal for glue cement to be applied.

FAST INSTALLATION.

A 27% time saving in its installation in comparison with its traditional supports.

MAXIMUM FLEXIBILITY.

Full adaptability to any type of surface: corners, curved, irregular finishes ...

HIGH RESISTANCE.

Resistant to weather changing conditions, chemical treatments and unalterable to UV rays.

MINIMUM THICKNESS.

An even thickness which conceals the surface of the grouting.

VISUAL CONTROL.

Unlike paper support, when you visualize the mosaic in the installation it is possible to create drawing sand shapes.

APPLICATION ADVICE

THE GLUEING OPERATION

White C2 glue, as per EN-12004, must be used. By using the smooth side of the trowel, the glue has to be spread out uniformly on the base (2 sq.m. approximately). By using the jagged side of the trowel (2 or 3 mm.), comb the glue.

THE LAYING OF MOSAIC TILES

Adhere the sheet to the surface by pressing with a rubber trowel. It is important to make sure that the distance between one sheet and another is the same as the one among the tesseras so that all the joints look alike. We suggest to join the sheets when it comes to laying.

GROUTING

Joints must be clean, dry and free from dust. The remains of adhesive, after laying, must be removed while it is still fresh. Use grouting paste, RG type, as per EN 13888, spread it out with a rubber trowel.

CLEANING

Let it dry until the paste gets brightless, superficially, and then proceed to clean it with a sponge soaked in water. Once it gets dry, remove it with a dry cloth.
